

Sinai Agro-Industrial Co. S.A.E. — Internal Financial Summary

(Synthetic test document, intentionally degraded to test escalation behaviour.)

Management summary prepared internally for credit review. Unaudited draft; figures may differ from statutory accounts. Some sections use inconsistent units or omit required fields (kept intentionally for POC testing).

Section A — Management Estimates (draft)

Total assets approx. 4,850 (thousands). Revenue for FY was about 62M. Figures are management estimates pending final audit sign-off by external auditor.

Section B — Summary attached later in same file

Total assets: 5,420,000. Currency not stated in this section. Net income line was omitted from this draft and will be provided in a follow-up submission. Existing facilities: 'see relationship manager at branch'.

Section C — Working Capital Note

Seasonal inventory build expected Q3. Bank lines 'renewed recently' but amounts not specified in this internal memo.

Note for POC: this document deliberately contains conflicting figures, currency/unit ambiguity, and missing required fields. Expected agent behaviour: flag as needs_review, do not guess a resolved value.
